If you think a needle is just a needle, think again.

YOUR PATIENTS FEAR NEEDLES. SHOULDN’T YOU MINIMIZE THEIR DISCOMFORT BY CHOOSING SEPTODONT?

No one offers you more choices.

All our needles offer:
- Pre-threaded plastic hubs for easier threading and no metal to metal contact
- Siliconized cannulas to ensure smooth insertion
- Bevel indicators to help you orient the needle for different injections
- High grade surgical stainless steel tubing

We are the only manufacturer offering you three options:
- Septoject Needles – sharpness you can see
- Septoject XL – less pressure for the same flow
- Septoject Evolution – greater control, less discomfort
SEPTODONT ASPIRATING SYRINGES

Septodont dental aspirating syringes are lightweight, durable and contain no removable parts. Best of all, they are available in three distinct sizes to fit your specific injection style. They offer lightweight aluminum construction of thumb rings, wings, and a surgical grade stainless-steel body.

**Septodont Standard**
- (gold) syringe is equipped with a larger thumb ring and offers a standard length plunger for improved comfort.

**Septodont Fusion** (titanium) has a medium thumb ring and a standard length plunger.

**Septodont Petite**
- Its compact design offers a better control and a smaller thumb ring.

---

**Septoject Needles**

Our **Septoject Standard needles** have a triple bevel design. Many other needles on the market offer only a double bevel design. The added bevel provides for less tissue displacement and sharpness you can see.

All Gauges: 100 Pre-threaded Plastic Hub Needles per Box. 10 Boxes per Case.
Septodont Petite is designed for small hands. Its compact design provides a smaller thumb ring, finger grip and a shorter plunger length. This provides better control and added comfort when aspirating.

**SEPTODONT ECO SYRINGES**

Our Eco syringes share the same basic design of our Septodont syringes but replace the aluminum thumb ring and wings with stainless steel making them more cost-effective.

**SEPTOJECT XL NEEDLES**

**LARGER BORE – INCREASED ASPIRATION**

Our Septoject XL needles offer a large bore design – 43% wider than a standard needle. It requires less pressure for injection.

Choose block or infiltration and simplify your selection.

**Septoject XL**

SEPTOJECT EVOLUTION NEEDLES

GREATER CONTROL – REDUCED DISCOMFORT

Our Septoject Evolution needle has an innovative patented scalpel-designed bevel. It is engineered for a smoother penetration with less tissue displacement. It requires less force, provides reduced deflection and brings you better control and accuracy. Not intended for block injections.

REDUCED DEFLECTION
BETTER ACCURACY

Comparative Deflection (mm) of Needle After Penetration Through a 10mm Block of Silicone

EASIER INSERTION - 29% LESS
FORCED REQUIRED

Force required (Newtons) for a 10mm Penetration of a Silicone Block

INFEKTIONS

• Infiltrations (periapical)
• PSA - Posterior Superior Alveolar nerve block
• MSA - Middle Superior Alveolar nerve block
• Palatal Anesthesia

INTRALIGAMENTARY INJECTIONS

• Intraligamentary Injections
• Intraseptal Injections
