Super-Snap X-Treme
FINISHING & POLISHING

Advanced 3D Technology

Super-Snap X-Treme, the latest generation in X-Treme polishing, is designed to xceed the aesthetic x-pectations of patients today. Super-Snap X-Treme aluminum oxide disks offer x-tra thickness for greater flexibility and durability, and a new 3D semispherical grit to provide X-Treme gloss results. Super-Snap X-Treme—taking polishing to the next level!

- An enhancement to the original green and red Super-Snap disks
- Added thickness to increase durability, pressure and tactile feel while maintaining flexibility interproximally without warping
- 3D X-Tra coating on red superfine disk – semispherical shaped grits – reduces clogging, secondary scratches and achieves X-Treme gloss results
- Achieves X-Treme gloss levels with X-Tremely low surface roughness
- 2 sizes, double sided disposable aluminum oxide disks – standard 12mm and mini 8mm
- For a complete 4-step system – use with Super-Snap coarse (black) and medium (violet) refill disks

Super-Snap Black Disk Coarse
Laser microscope disk surfaces (x400)

Super-Snap Violet Disk Medium

Super-Snap Green Disk Fine

Super-Snap X-Treme polishing disks are thicker than Super-Snap allowing for greater force to be applied during polishing. The added thickness creates a greater tactile feel and produces higher gloss results.

Super-Snap X-Treme’s red 3D aluminum oxide grits allow space for ground debris to be discharged during polishing. This helps prevent secondary scratches, clogging, and reduce generated heat without any denaturing of the material.

Super-Snap, the 4-step disk system, is designed for easy, fast and safe contouring, finishing and polishing of all microfilled and nano-hybrid composites. The grit consists of silicon carbide or aluminum oxide, without a metal center to risk gouging. Super-Snap disks are ensured to deliver superior polish and high gloss results. Super-Snap Poly strips offer the same results as the Super-Snap disks but are double-ended strips, with a different grit at each end for interproximal areas.

- Easy to use 4-step contouring, finishing and polishing system
- Color coded by grit size, course (black), medium (violet), fine (green) and superfine (red)
- Ultra-thin, high flexibility is ideal for interproximal use
- No metal center eliminates risk of gouging
- Elastic silicone shank mount for easy placement on the mandrel
- Disposable double sided disks in 2 sizes – 4 grits (silicon carbide and aluminum carbide)
- Available as a kit or single packs
### Order Information

**Super-Snap X-Treme Kits**
- Part Number 0506 – 50 green standard X-Treme disks, 50 red standard X-Treme disks
- Part Number 0507 – 50 green mini X-Treme disks, 50 red mini X-Treme disks

**NEW! Super-Snap X-Treme Ultra-Gloss Performance Kits**
- Part Number 0500XS – 100 Super-Snap standard disks, 100 Super-Snap X-Treme standard disks, 25 Super-Snap Buff disks, 4 CA metal mandrels, DirectDia polishing paste, **BONUS**: F00 A2 Beautifil Flow Plus and compartment case
- Part Number 0500XM – 100 Super-Snap mini disks, 100 Super-Snap X-Treme mini disks, 25 Super-Snap Buff disks, 4 CA metal mandrels, DirectDia polishing paste, **BONUS**: F03 A2 Beautifil Flow Plus and compartment case

**Super-Snap Kits**
- Part Number 0500 – Rainbow Technique Kit 100 standard disks, 80 mini disks, 40 polystrips, 2 Dura-White Stones (CN1 and FL2), CompoSite fine mini-point, 4 CA metal mandrels
- Part Number 0505 – Mini Kit 32 standard disks, 16 mini disks, CompoSite fine mini-point, CA metal mandrel

**Super-Snap Singles – Individual Patient Use**
- Part Number 0501 – Singles 2 disks of coarse, medium, fine and super fine grits, Super-Snap plastic CA mandrel
- Part Number 0502 – Standard 1 disk of coarse, medium, fine, super fine grits, CA mandrel
- Part Number 0503 – Mini 1 disk of coarse, medium, fine, super fine grits, CA mandrel

**See chart above for individual shapes**
