TwinPower Turbine® Maintenance
All Models - Basic Series Excluded
(See reverse side for Basic Series Handpieces)

**IMPORTANT**
Turbines may fail quickly if maintenance is not performed consistently and correctly.
Perform these maintenance procedures after treatment and before autoclaving.

1. **Cleaning**
   - Remove bur from handpiece.
   - Remove cutting debris, blood, and other contaminants with a soft brush and running water.
     - Do not fail to wash off all chemical, electrolytic, and other active liquids.

2. **Disinfection**
   - Use gauze or a soft brush with disinfecting alcohol on the entire handpiece.
   - Handpieces with the following mark may be cleaned and disinfected with a thermal washer and disinfector:
     - To use a thermal washer and disinfector, do not fail to follow the instructions and conditions that come with the handpiece.

3. **Lubrication/Cleaning**
   - **a. Manual** (Lubricate with AR Spray)
     - Lubricate the chuck and the handpiece with AR Spray for 3 seconds each.
     - Operate the handpiece for a minimum of 15 seconds to remove excess lubricant.
     - Wipe excess lubricant off the surface of the handpiece.
     - Use the proper nozzle for type of handpiece joint.
     - Do not press down on the push cap of the handpiece during operation.

   - **b. Automated** (Lubrina with AR Spray)
     - Perform chuck lubrication using Lubrina’s built-in Chuck Nozzle.
     - Line up the front end of the head with the nozzle guide and set the chuck in place.
     - Lift the handpiece up slightly to begin cleaning and lubricating for about 5 seconds (beep sounds).
     - Attach handpiece to its coupling with the chuck facing back.
     - Select Station 1-4.
     - Wipe excess lubricant off the surface of the handpiece.
     - Refer to the user’s manual on how to operate Lubrina.

4. **Sterilization**
   - Place the handpiece in a sterilization pouch and autoclave at 135°C (275°F) for a minimum of 5 minutes of sterilization time.
     - Autoclave and drying temperatures must not exceed 135°C (275°F)

5. **Storage**
   - Remove the handpiece from autoclave unit and store carefully.

**NOTE**
- Wear surgical gloves to perform maintenance.
- Use AR Spray only.
- See user’s manuals for details.
TwinPower Turbine® Maintenance
Basic Series
(See reverse side for maintenance instructions for all other models)

⚠️ IMPORTANT
Turbines may fail quickly if maintenance is not performed consistently and correctly.
Perform these maintenance procedures after treatment and before autoclaving.

1. Cleaning
   - Remove bur from handpiece.
   - Remove cutting debris, blood, and other contaminants with a soft brush and running water.
     ❗️ - Do not fail to wash off all chemical, electrolytic, and other active liquids.

2. Disinfection
   - Use gauze or a soft brush with disinfecting alcohol on the entire handpiece.
   - Handpieces with the following mark may be cleaned and disinfected with a thermal washer and disinfector:
     ❗️ - To use a thermal washer and disinfector, do not fail to follow the instructions and conditions that come with the handpiece.

3. Lubrication/Cleaning
   a. Manual (Lubricate with AR Spray)
      - Lubricate the chuck and the handpiece with AR Spray for 3 seconds each.
      - Operate the handpiece for a minimum of 15 seconds to remove excess lubricant.
      - Wipe excess lubricant off the surface of the handpiece.
      ❗️ - Use the proper nozzle for type of handpiece joint.
      - Do not press down on the push cap of the handpiece during operation.
   b. Automated (Lubrina with AR Spray)
      - Perform chuck lubrication using Lubrina's built-in Chuck Nozzle.
        - Line up the front end of the head with the nozzle guide and set the chuck in place.
        - Lift the handpiece up slightly to begin cleaning and lubricating for about 5 seconds (beep sounds).
      - Attach handpiece to its coupling with the chuck facing back.
        - Select Station 1-4.
        - Wipe excess lubricant off the surface of the handpiece.
      ❗️ - Refer to the user's manual to operate Lubrina.

4. Sterilization
   - Place the handpiece in a sterilization pouch and autoclave at 135°C (275°F) for a minimum of 5 minutes of sterilization time.
   ❗️ - Autoclave and drying temperatures must not exceed 135°C (275°F)

5. Storage
   - Remove the handpiece from autoclave unit and store carefully.

NOTE
- Wear surgical gloves to perform maintenance.
- Use AR Spray only.
- See user's manuals for details.
