*Estelite Bulk Fill Flow*

Includes 1 – 3g syringe; 10 tips; Shade Card; Instructions for Use

**Excellent wear resistance**

Estelite Bulk Fill Flow highly resists abrasion and wear for long-lasting posterior restorations.

![Graph showing wear resistance comparison]

**U Shade Indications:**

- For lighter shades or cervical enamel restorations.
- For restorations deeper than 4mm: U shade can be used as a bulk fill base liner. Another layer of Estelite Bulk Fill Flow should be placed to finish the restoration.

Many leading flowable bulk fills require a capping layer of another composite because they lack the esthetics or strength to complete a restoration on their own. With Estelite Bulk Fill Flow, higher shade matching, opacity, and glossiness ensure greater esthetics than other brands, while higher compressive strength, cavity adaptation, and lower shrinkage stress offer restorations that are more reliable as well.

With **no capping layer** or other composites needed, having quick, beautiful, and worry-free bulk fill restorations won’t take any extra steps with Estelite Bulk Fill Flow.

**Now bulk fill restorations can be beautiful too**

5 shades with superior color matching ability blend across a range of different tooth shades, delivering a unique “Chameleon” effect.

---

**A faster bulk fill**

**Flowable with no capping layer needed**

The innovative formula in Estelite Bulk Fill Flow makes it more esthetic and stronger than other brands, no capping layer needed. Fill up to 4mm with no additional equipment or composites.

**Half the curing time of leading bulk fill composites**

10 seconds curing is all you need to deliver a beautiful and strong restoration for years to come.

---

**A bulk fill for worry-free restorations**

**The best cavity adaptation**

Estelite Bulk Fill Flow easily adapts to the cavity, flowing into the nooks and crannies, providing an excellent marginal seal and preventing restoration failure.

**Cured to the bottom of the restoration**

Thanks to its high translucency at placement, Estelite Bulk Fill Flow cures all the way to the bottom of a 4mm deep restoration in only 10 seconds.

**Minimal shrinkage stress**

The spherical fillers used in Estelite Bulk Fill Flow reduce shrinkage stress and linear shrinkage to a minimum.

**Glossiness (%)**

- **Estelite Bulk Fill Flow**: 93%
- SureFill SDR Flow+
- Filtek One Bulk Fill*
- Filtek Bulk Fill Flowable*
- Filtek Bulk Fill Posterior*
- SonicFill 2*
- Tetric EvoCeram Bulk Fill*

**Shrinkage Stress and Linear Shrinkage**

- Estelite Bulk Fill Flow: 2.1 MPa, 0.64%
- SureFill SDR Flow+: 2.6 MPa, 0.65%
- Filtek One Bulk Fill*: 2.5 MPa, 0.81%
- Filtek Bulk Fill Flowable*: 1.4 MPa, 0.54%
- Tetric EvoCeram Bulk Fill*: 1.25 MPa, 1.5%

---

**From translucent to opaque**

**Translucent before curing**

To help the light reach the bottom of the restoration

**More opaque when cured**

For a more natural look than other bulk fill composites

---

**Incredible long lasting glossiness and easy polishability**

Estelite Bulk Fill Flow reaches over 90% glossiness in only 60 seconds of polishing, providing a long-lasting glossiness for years to come.

---

**Marginal failure, gaps, and voids were common in other tested brands.**
